

# Service Learning in Engaged Design and Planning: Earthscan Tools for Community

## A Comprehensive Guide to Service Learning in Design and Planning

Service learning is a form of experiential education in which students engage in community service while also learning about and applying academic concepts. Service learning has been shown to have a number of benefits for students, including increased academic achievement, improved critical thinking skills, and increased civic engagement. In the fields of design and planning, service learning can be a particularly effective way to teach students about the social and environmental challenges facing communities and to help them develop the skills they need to address these challenges.

Service Learning in Engaged Design and Planning: Earthscan Tools for Community is a comprehensive guide to service learning in the fields of design and planning. The book provides a theoretical framework for understanding service learning, as well as practical tools and techniques for implementing service learning projects. The book is written by a team of experienced educators and practitioners who have extensive experience in service learning in design and planning.

## Community Matters: Service-Learning in Engaged Design and Planning (Earthscan Tools for Community Planning)
