

# Travels With The Man Who Invented History

In 440 BC, a young Greek named Herodotus set out on a journey that would change the course of history. He traveled for years, from Egypt to Persia to Scythia, interviewing people from all walks of life and collecting stories about their cultures, beliefs, and traditions. His writings, known as the *Histories*, are an invaluable source of information about the ancient world and are considered to be the foundation of Western historiography.

In *Travels With The Man Who Invented History*, author Justin Marozzi follows in Herodotus' footsteps, retracing his epic journey and exploring the lost world he encountered. Marozzi brings Herodotus' *Histories* to life, using vivid descriptions and engaging storytelling to transport readers back in time. He also provides fresh insights into Herodotus' methods and motives, and examines the ways in which his work has shaped our understanding of the past.
